- CSS3
- GIT
- Node.js
- Express.js
- Knex.js
- Jest.js
- Mocha.js
- Java
- Android Studio
- MySQL
- MongoDB
- Firebase

ABOUT ME

Full Stack developer with almost 2 years of experience in programming.

On front-end I'm experienced with React, Redux, API's integrations, responsive layouts, Atomic Design, Storybook and styling libraries such as styled-components and Material-UI.

On back-end, I've already developed RESTful API's using Node.js and Typescript, and data modeling using both relational and non-relational databases.

I'm familiar with Clean Code principles, Agile Methodology, unit and automated tests.

I have an artistic background as musician and tattoo artist, and currently I'm willing to incorporate these experiences in my developer career.

EXPERIENCE

FULL-STACK DEVELOPER

Vizir Software Studio: April 2021 ~ Present

Shopping Omni: April 2021 ~ June 2021

Production-ready tool, targetting shopkeepers, where is possible to manage products, orders, integrating stores to marketplaces of RioMar and B2W chains.

I've worked both on Back-end using Typescript/Node and on Front-end, using Javascript/React and Redux (Duck/Saga) for state management.

MongoDB - Web Team: June 2021 ~ Present

Currently I'm a contractor at of the agile development team at MongoDB. International team responsible for maintain, sustain and develop new features for all website under mongodb.com domain. In this project I work especially delivering bug fixes and improvements, as a Full Stack, but mostly on Front-end.

I've participated actively in the Digital Transformation of MongoDB official website, in a visual identity reformulation project. I've worked alongside with design team, colaborating with decisions making, developing testable components using Atomic Design principles, documentating with Storybook and building content block for the platform behind www.mongodb.com

ALINE VIGNOLI
